Agreement for Non-Qualifying Generation – Emergency and Standby (Types 3 and 4)

This agreement allows the owner of the emergency generation facility to operate its facility. The owner is bound by the LES Service Regulations, the Application for Non-Qualifying Generation – Emergency and Standby and any provided attachments, and the associated Requirements for Non-Qualifying Generation – Emergency and Standby which are all incorporated herein by reference.

First Time Operation

LES has witnessed the trip check and first parallel/closed-transition operation of the emergency generation facility. The owner of the emergency generation facility has provided LES with final interconnection relay settings.

LES/Owner Agreement

The owner of the emergency generation facility certifies that:

- The emergency generation facility has passed all required code inspections.
- The owner has affixed LES labels as required.
- LES will be provided with any future control system and/or interconnection relay setting changes and LES approval will be required prior to implementation of these changes.
- The owner agrees to the requirements stated in this agreement.
